HAZARD Look only for hazards which you could reasonably expect to result in significant harm under the conditions in your workplace. Use the following examples as a guide: • Slipping / tripping hazards • Working at any height • Machinery • Vehicular movement • Flammable materials / sources of origin • Manual handling • Chemicals • Aggressive people / challenging behaviour • Electricity • Noise / vibration / dust / noise • Workplace stressors • Lay-out of workplace • Other things that could cause significant harm	WHO MIGHT BE HARMED? There is no need to list individuals by name – just think about groups of people doing similar work or who may be affected. Some examples are: • Office Staff / depot staff / reception staff • Peripatetic workers • Machine operators • Contractors • Cleaners • Members of the public • People sharing your workplace Pay particular attention to: • People with disabilities • New or expectant mothers • Young or inexperienced staff • Lone workers • Visitors / children	IS THE RISK ADEQUATELY CONTROLLED? Have you already taken precautions against the risks from the hazards you listed? For example, have you provided: • Adequate information, instruction, training and supervision? • Adequate systems or procedures? Do the precautions: • Meet the standards set by a legal requirement? • Comply with a recognised industry standard? • Represent good practice? • Reduce risk as far as reasonably practical? If so, then the risks are adequately controlled, but you need to indicate the precautions you have in place. You may refer to procedures, manuals, other council documents giving the information.	WHAT FURTHER ACTION IS NECESSARY TO CONTROL THE RISK? What more could you reasonably do for those risks which you found were not adequately controlled? You will need to give priority to those risks which affect large numbers of people and/or could result in serious harm. Apply the principles below when taking further action, if possible in the following order: • Remove the hazard completely • Substitute a safer alternative • Provide a safe system of work • Prevent access or exposure to the hazard • Organise work to reduce the frequency of exposure to the hazard • Issue personal protective equipment • Provide welfare and first aid facilities
